

26 Express key and dial planner

Column one is a starting point that works for painting in Photoshop. Column two is what you end up with after a fortnight of real use. They will not match, and that is the point.

Artist 12 (3rd Gen) - 8 express keys, 2 dial wheels (X-Dial).

The driver's floating on-screen menu shows what each one is currently set to.

Control	Suggested for Photoshop	What I actually set it to
K1	Undo Ctrl/Cmd+Z	_____
K2	Brush tool B	_____
K3	Eraser tool E	_____
K4	Rotate View R	_____
K5	Reset view Esc	_____
K6	Fit on screen Ctrl/Cmd+0	_____
K7	New layer Ctrl/Cmd+Shift+N	_____
K8	Tab (hide all panels)	_____
Dial 1	Brush size [and]	_____
Dial 2	Zoom in / out	_____
Notes - what kept annoying me		

Set these in the XP-Pen driver, not in Photoshop.
